

AKIL PRABHU A

Software Engineer | ASP.NET Core | C# | SQL Server | REST APIs | AI Dev

Coimbatore, India • 88708 56165 • akilprabhu2004@gmail.com • linkedin.com/in/akil-prabhu

TECHNICAL SKILLS

- › C# | .NET Core
- › ASP.NET Core
- › ASP.NET MVC
- › Web API
- › Entity Framework
- › JavaScript
- › HTML5 | CSS3 | Bootstrap
- › Razor Views
- › SQL Server
- › Git | Visual Studio

AI TOOLS

- › Claude (Anthropic)
- › Windsurf IDE

CONCEPTS

- › OOP Principles
- › REST API Design
- › Service Architecture
- › SQL Optimisation
- › Background SQL Jobs

EDUCATION

B.Com. — Digital Marketing & Data Mining

Dr. SNS Rajalakshmi College of Arts & Science, Coimbatore
2021 – 2024 | 80%

CERTIFICATIONS

Claude 101

Anthropic — Foundations of using Claude effectively

Claude Code 101

Anthropic — AI-assisted software development with Claude Code

Prompt Engineering with Claude

Anthropic Academy — Designing effective prompts for reliable AI output

Web API Development

GUVI | REST | HTTP | JSON | .NET

C# with Windows Forms

GUVI | C# | OOP | WinForms | .NET

PROFILE

Software Engineer with 2 years of experience building and maintaining enterprise web applications using ASP.NET Core, ASP.NET MVC, C#, and SQL Server. Proven in delivering production-grade REST APIs, business logic, and database-driven modules across 5 live enterprise portals. Skilled in applying AI tools — including prompt engineering with Claude and Windsurf IDE — to accelerate code review, feature delivery, and day-to-day engineering workflows. Strong team collaborator who follows coding standards and is committed to continuous growth in modern engineering and AI-assisted development practices.

PROFESSIONAL EXPERIENCE

Software Engineer at Bannari Amman Spinning Mills Ltd

Dec 2025 – Present

Coimbatore, India

- › Develop and maintain 5 enterprise portals — Agent CRM, ESS Portal, MIS Reports, Hangfire Notification System, and Knitting Invoice System — using ASP.NET MVC, .NET Core, and C#
- › Implement REST APIs, backend business logic, and SQL Server stored procedures supporting attendance, payroll, and invoicing workflows for 1,000+ employees across 3 entities
- › Build UI components using HTML, CSS, Bootstrap, and Razor following team coding standards; leverage Claude AI and Windsurf IDE to improve code quality
- › Optimise SQL queries and resolve production bugs, improving stability across multiple live portals
- › Collaborate with senior engineers in sprint planning, code reviews, and delivery cycles

Software Developer at Creative Ideas IT Solutions

Oct 2024 – Nov 2025

Coimbatore, India

- › Built and maintained client web applications using ASP.NET Core and ASP.NET MVC within an agile team
- › Implemented CRUD operations, service-based architecture, and third-party API integrations across multiple projects
- › Wrote and optimised SQL queries; identified and resolved defects through unit and integration testing cycles
- › Developed responsive UI components with JavaScript, HTML, and CSS to client specifications

KEY PROJECTS

Hangfire Notification System .NET Core | Hangfire | SQL Server

- › Designed automated background job scheduler for employee attendance notifications covering leave and permission tracking organisation-wide

Agent CRM .NET MVC | SQL Server | AI Tools

- › Developed and maintained 4–6 modules in a live enterprise CRM used by ~450 agents daily; built backend services and optimised SQL queries improving module reliability

ESS Attendance Portal .NET MVC | SQL Server

- › Maintained attendance and payroll portals for 3 company entities — Bannari Mills, Shiva Mills, and Automobiles — serving 1,000+ employees; handled backend data processing and resolved critical production issues

Knitting Invoice System ASP.NET Core | SQL Server

- › Contributed to 4 modules in an enterprise document management application used daily by senior-level employees; application handles end-to-end generation and download of reports, invoices, and documents as Crystal Reports, PDF, and Excel formats across company operations

Prime Delay Order ASP.NET Core | SQL Server

- › Developed and maintain 3 modules in an automated daily mail dispatch system that sends current-day production and sales reports to 150–200 senior employees responsible for the process; scheduler runs automatically each day with no manual intervention
